Fields and activity centers

**Content:**

Since the outbreak of Wuhan pneumonia on the other side of the country at the end of 2019 and spread to the present, 34 billion people in 196 countries have been continuously infected with the new coronavirus pneumonia by mutant strains. Because the international epidemic situation continues to be severe and the risk of transmission of the new Omicron variant is very high recently, in order to improve the defense against the virus and reduce the loss of life and property, we, the correctional institutions, are not left behind, and we continue to work hard to promote and Arrange vaccination to increase the vaccination rate of inmates and staff, and achieve the highest epidemic prevention principle of watertightness.

health department promotion  
The international epidemic continues to be severe and the risk of transmission of the new variant of Omicron is very high. In order to protect you, me and your family, please apply to the supervisor if you have not been vaccinated. (Dana vaccine)  
According to the department's instructions: For those inmates who have not been fully vaccinated with 2 doses, they are not allowed to participate in out-of-prison operations and activities that may come into contact with unspecified persons \*
